DESIGN YOUR SPACE

Designer Surfaces offers a range of Italian porcelain slabs designed for the residential and commercial market. These large format slabs are uniquely manufactured to offer a surface solution like no other existing tile product can offer.

The decorative surfaces are utilised across architectural spaces on walls, flooring, kitchen benchtops, external facades and furniture, facilitating clients to make a personalised statement in their environment.

DESIGNER SURFACES

Heat Resistant

Designer Surfaces slabs provide the luxury of heat resistance, making our products ideal for Kitchen applications such as induction cooktops.

As the product can resist such high temperatures. This makes them highly sought after for outdoor Kitchens & BBQ's.

SAVOY BLUE

COOKING
SURFACE PRIME

COOKING Surface Prime, the new invisible induction cooking system born from a matching process of Material and Technology.

COOKING Surface Prime offers the best quality together with an advanced design that perfectly fits in every space. What, at first sight, looks like a simple slab, hides an integrated induction cooking system.

A kitchen top for cooking lovers, both for innovative ones and conservative ones. A technology that allows a creative workspace.

DESIGNER SURFACES

Scratch Resistant

Designer Surfaces slabs are the ideal solution for places with heavy traffic exposed to intensive wear and stresses on a daily basis. In fact, they withstand fire and high temperatures, impacts, abrasions, acids and moulds.

STATUARIO SUPERIOR

Stain Resistant

Having virtually no porosity, Designer Surfaces slabs are structurally hygienic, as they are non-absorbent, they do not allow dirt to build up below the surface.

The ceramic surface's extreme compactness gives it resistance to detergents and acids.

Manufactured from natural raw materials, porcelain stoneware large slabs are perfect for food preparation, when hygiene and cleanliness are essential requirements. They are also 100% eco-friendly for the same reason.
